

the method for performing optical scanning according to any one of claims  
31 to 41;

placing a photosensitive member on the scanned surface;

developing an electrostatic latent image formed on the photosensitive  
member by a light beam scanned by the optical scanning apparatus into a toner image;

transferring the developed toner image onto a transfer medium; and

fixing the transferred toner image on the transfer medium.

43. (New) An image forming method comprising the steps of:

the method for performing optical scanning according to any one of claims

31 to 41;

converting code data input from an external device into an image signal; and

inputting the signal to the optical scanning apparatus.--

#### REMARKS

Claims 1-16 and 18-43 are presented for examination, of which Claims 1-16 have been allowed. Claim 17 has been canceled, without prejudice or disclaimer of the subject matter presented therein. New Claims 18-43 have been added to provide Applicants with a more complete scope of protection. Claims 1, 14, 18, and 31 are in independent form.

Applicants respectfully request favorable consideration and early passage to issue of the present application.

Applicants' undersigned attorney may be reached in our New York office by telephone at (212) 218-2100. All correspondence should continue to be directed to our below listed address.

Respectfully submitted,

Attorney for Applicants
